Art Unit: 3712

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Lankhuijzen (5,582,345) or Pearce et al (5,085,316), both cited by the applicant. Claims 1-36 are drawn to packaging for holding a pan and cover. Accordingly, no pan and cover are claimed, and therefore all references in claims 1-36 to any pan and cover are not considered to be further structurally limiting with respect to the claimed packaging. All such references to a pan and cover are presumed to recite only functions or intended uses of the claimed packaging.

Either reference appears to show packaging having all of the features of the claimed packaging. For example, with respect to claim 1, either reference discloses an elongated sheet having a first part secured to a second part, panels and at least one hole in a panel and another hole in a portion of the sheet. Since the packaging disclosed in either reference has all of the structural elements of the claims, the packaging is presumed to be inherently capable of all of the claimed functions, including use to hold some pan and some cover of the right size and shape for the packaging.

3. Claims 27-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Rey et al (4,407,414). Rey is applied as were the references above. Coincidentally, Rey does teach a pan between the secured ends of the sheet with its handle received in a hole in a portion of the sheet. However, as was noted above, a reference need not show a pan (or a cover) to be applied against claims 1-36 since none of these claims requires a pan or a cover.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-26, 36 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rey et al. The reference shows most of the elements of the claims but lacks the second hole as recited in claims 1 and 36. On the other hand it would have been obvious to provide the wrapper of Rey et al with at least another hole for the purpose of accommodating therein a pan with two handles. Method claim 37 is an obvious method of using the wrapper of Rey.
